

Colloquium

Soil – Water – Rock

Summer Term 2018

Thursday, 4.30 p.m., Albertstr. 23 B, HS 1

17.05.2018	Jürgen Reitner (GBA Wien) Variety and chronology of landslides in the Eastern Alps
07.06.2018	Andrew Ireson (Uni Saskatchewan) The hydrology of the Canadian Prairies
21.06.2018	Juraj Majzlan (Friedrich-Schiller-Universität Jena) Weathering of tetrahedrite – a story of many elements
28.06.2018	Gerhard Schmidt (Uni Heidelberg) Fault-controlled fluid ascent at hydraulically active segments of the Rhine Graben: Clues from chemistry and isotopic tracers in near-surface ground water
05.07.2018	Masaki Hayashi (University of Calgary) Alpine hydrogeology: The critical role of groundwater in sourcing the headwaters of the world
12.07.2018	Christof Hübner (Hochschule Mannheim) Electromagnetic soil-moisture measurement - Trends in development and applications
